

PRE-UNIVERSITY

STPM Programme

A university-preparation programme built around advanced subject mastery, independent study skills and critical analysis — with a fully-featured MUET component to secure a competitive band.

01 TEACHING METHOD — THE THREE-STAGE KEPLER SYSTEM

1

Advanced Concepts

Deep understanding of complex topics and applications.

2

Independent Practice

Guided independent practice with structured question analysis.

3

Critical Analysis

Evaluation, synthesis and high-level problem solving for university readiness.

02 STUDENT SUPPORT

Progress Tracking

Semester benchmarking against STPM CGPA targets.

Parent Feedback

Transparent reporting for older students who need family support.

Consultation Hours

Extra teacher time outside class for challenging topics.

Small Cohort

Real attention on each student's trajectory.

03 SUBJECTS & LEARNING OUTCOMES

B

Biology

Cellular biology, physiology, genetics, ecology at pre-university depth.

C

Chemistry

Physical, organic and inorganic chemistry with quantitative rigour.

P

Physics

Mechanics, thermodynamics, electromagnetism, modern physics.

M

Mathematics (M)

Calculus, algebra, statistics and mathematical modelling.

05 REGULAR CLASS SCHEDULE

SUBJECTS	DAYS	DURATION
All Subjects	Mon & Wed or Tue & Thu	1.5 hrs

Private Class

Group Class

04 FEATURE MODULE · MUET PREPARATION

MUET Preparation

Integrated across the STPM year — a structured programme covering every band-scored component with dedicated clinics and mock examinations.

Listening

Speaking

Reading

Writing

✓ Mock Examinations

✓ Exam Strategies & Band-oriented Techniques

06 NEED ANOTHER SUBJECT?

Let's discuss a customised plan.

PRIMARY · YEAR 4 – 6

UASA Programme

Aligned with the latest KSSR syllabus, our UASA programme builds a confident foundation in Mathematics, English and Science — a friendly, structured start that grows real understanding, not memorisation.

01 TEACHING METHOD — THE THREE-STAGE KEPLER SYSTEM

1

Concept Learning
Chapter-by-chapter explanation and concept mastery.

2

Guided Practice
Topic-based exercises, guided practice and step-by-step guidance.

3

Assessment & Feedback
Chapter tests, progress tracking and structured parent feedback.

02 STUDENT SUPPORT

Progress Tracking
Regular assessments to monitor learning progress and identify gaps early.

Parent Feedback
Parents receive structured updates on performance and improvement.

Homework Review
Teachers review homework and explain mistakes to reinforce understanding.

Exam Preparation
Practice with exam-oriented questions and revision techniques.

03 SUBJECTS & LEARNING OUTCOMES

M

Mathematics
Numbers & operations, fractions, geometry, problem solving, HOTS.

E

English
Grammar, vocabulary, reading, writing and speaking fluency.

S

Science
Scientific investigation, life science, physical science, earth & space, critical thinking.

04 REGULAR CLASS SCHEDULE

SUBJECT	DAYS	DURATION
Mathematics	Mon / Wed or Tue / Thu	1.5 hrs
English	Mon / Wed or Tue / Thu	1.5 hrs
Science	Mon / Wed or Tue / Thu	1.5 hrs

05 WHY KEPLER FOR UASA

✓

Strong Foundation
Concept-first teaching so children truly understand, not memorise.

✓

HOTS Focused
Every subject develops higher-order thinking, in line with UASA.

✓

Structured but Fun
Age-appropriate pace keeps young learners engaged and confident.

✓

Consistent Feedback
Parents stay informed with regular, honest progress updates.

SECONDARY · FORM 4 – 5

SPM Programme

Aligned with the latest KSSM syllabus, our SPM programme sharpens concept mastery, past-year problem solving and examination technique — helping students achieve the results that open the next door.

FOCUS
Past-Year Questions

FOCUS
Exam Techniques

HIGHLIGHT
Biology · Friday Special 2 hours

01 TEACHING METHOD — THE THREE-STAGE KEPLER SYSTEM

1

Concept Mastery
Deep syllabus coverage and concept clarity.

2

Past-Year Practice
SPM-style questions, timed drills and marking-scheme training.

3

Exam Technique
Answer structuring, time management and full mock papers.

02 STUDENT SUPPORT

Progress Tracking
Continuous assessment against SPM benchmarks.

Parent Feedback
Termly reports and one-to-one parent consultations.

Homework Review
Detailed corrections addressing each student's weak points.

Exam Preparation
Intensive revision sprints before every trial and SPM.

03 SUBJECTS & LEARNING OUTCOMES

M

Mathematics
Algebra, geometry, statistics; strong problem-solving base.

M+

Add. Mathematics
Advanced algebra, calculus, trigonometry and coordinate geometry.

S

Science
Foundational cross-discipline science for non-pure streams.

B

Biology
Cells, physiology, ecology; practical-oriented preparation.

C

Chemistry
Structure, stoichiometry, organic chemistry, mechanisms.

P

Physics
Mechanics, waves, electricity, electromagnetism.

E

English
Comprehension, essay writing, oral fluency and exam response.

Ec

Economics — upon request
Micro / macro fundamentals in a customised class.

04 REGULAR CLASS SCHEDULE

SUBJECT GROUP	DAYS	DURATION
All subjects	Mon & Wed or Tue & Thu	1.5 hrs
Biology SPECIAL	Friday	2.0 hrs

Biology special note. Friday sessions run for two hours to allow practical-focused coverage and full past-year practice.

05 WHY KEPLER FOR SPM

✓

Exam Technique First
Marking-scheme literacy built into every lesson.

✓

Past-Year Depth
Curated question bank covering the last decade of SPM papers.

✓

HOTS & Critical Thinking
Analysis that trains students to think, not to guess.

✓

Subject Specialists
Each subject taught by a dedicated teacher.
